Portfolio: <https://vermilion-resume.netlify.app/>

Adaeze Ndupu is a budding frontend developer with 2 years of experience converting still-life designs to interactive and responsive websites.

She is a problem solver and pursues user satisfaction from creating websites and products that provide solutions to companies or individuals.

EXPERIENCE

JUNE 2022 – PRESENT

FRONT END FELLOW, TIIDELAB

Carried out User research with a team of developers for a project (Q&A platform) which helped define the users and their pain points.

Designed User Interface using Figma, implemented with HTML, CSS, Javascript and converted to React.

Worked in an agile environment with daily stand-ups, material sharing and consumption, and bi-weekly sprint planning and presentation.

JUNE 2021

FRONT END DEVELOPER INTERN, SIDE HUSTLE

Determined structure and design of web pages.

Replicated pixel perfect and responsive designs while ensuring optimization.

Collaborated with product team members to implement designs.

Mentored team members on concepts they faced difficulty with.
