Enthusiastic Frontend Developer with hands on experience; eager to contribute to team success through hard work, attention to detail and excellent pixel perfect design skills. Motivated to learn, grow and excel in the technology industry as a whole.

Work History

2022/01-Present

Open-Source Developer
Communitypro, Remote
- Contributed to Communitypro, an open-source community of developers for learning and building projects.

2021/08 – Present

Quality Control Engineer
Zuri chat, Nigeria
- Tested site and documented bugs found.
- Suggested corrective actions for some workflows.
- Ensured the smooth running of the to-be deployed site in staging.

Frontend Developer Intern (chess plugin team)
Zuri chat, Nigeria
- Implemented the home page for the chess plugin.
- Ensured responsiveness across the chess plugin.
- Worked with the Zuri team to clear bugs.

2021/06 – 2021/07

Frontend Developer Intern
Side Hustle Internship, Nigeria
- Determined structure and design of web pages.
- Replicated pixel perfect and responsive designs while ensuring optimism.

PROJECTS
- Tribute Page – A tribute to person of choice using HTML only. (https://github.com/vermilion4/Tribute-Task)
- Dark Themed Landing Page
- Javascript Counter App

2020/07 – 2021/02

Node.js Developer Intern
The Code Center, Lagos, Nigeria
- Developed and maintained server-side network components.
- Ensured optimal performance of the central database and responsiveness to front-end requests.
- Ran diagnostic tests, repaired defects, and provided technical support.
- Managed back-end services and the interchange of data between the server and the users.

PROJECTS
- Blog Web - A mini blog web app using express, ejs and Mongo db. (https://github.com/vermilion4/Blog)
- BizBridge - Built with NodeJS & Mongodb, the BizBridge application is an online directory for service-based/artisan businesses. Currently, service providers or artisans can come on the platform to upload their business details. People who need service can also get on the platform to search for what they need based on location. (https://github.com/vermilion4/BizBridge)
- NodePassport - A simple application using passport for authentication, bycryptjs for password encryption, ejs for view engine, express, Mongo db for database and connect-flash for flash messages.

(https://github.com/vermilion4/node_passport)
- CodeCenterWeb – A simple web application designed for The Code Center using NodeJS. (https://github.com/vermilion4/code_center_web)
- TCC – A simple CRUD app for a training center that registers a prospective student with courses of their choice and generates a receipt for payment using Node, Express and MySQL. (https://github.com/vermilion4/TCC_RECEIPT)

| 2019/01 – 2019/06 | ## Web Developer Intern |

The Code Center, Lagos, Nigeria

PROJECTS
- Final Year Project Management System (https://github.com/vermilion4/FinalYearProjectManagementSystem)
- Ecommerce Restful API (https://github.com/vermilion4/ecommerce-api)
- To-Do App – A to-do application built using react for its front end. (https://github.com/vermilion4/react-to-do-app)
- Express App - This is an express app for a to-do list with connections using mongoose and connecting to a remote server called mongodb atlas. It has only a server which shows what happens at various endpoints. Tested using Postman. (https://github.com/vermilion4/express-app)

Skills

- Sound knowledge of HTML, CSS, JavaScript, React, WordPress, Python, Bootstrap, Git, jQuery, NodeJS, Express.
- Excellent writing and verbal communication skills
- Working knowledge of relational and non-relational databases MySQL, MongoDB.
